

# Network Disclosure Announcement #347

Public Notice of Network Change(s), pursuant to CFR 47, subsections 51.325 - 51.335.  
Qwest Communications Internet address: <http://www.qwest.com/disclosures>.

## Central Office - Automatic Call Distribution (CO-ACD) Management Information System (MIS) Host to Remote Terminal Interface - Report Partner UPDATE 5/17/97

**Original Disclosure Date: September 12, 1995**

**Revision to Network Disclosure #274**

This announcement adds a new location to U S WEST's deployment list shown below where the Report Partner - Host Computer to Remote Terminal Interface will be available. The new location is Olympia - Whitehall in Washington. No other changes have been made to this disclosure. The content has been reiterated as this document completely replaces Network Disclosure #274.

### Summary:

In conjunction with U S WEST's CO-ACD Management Information System (MIS) interface for the Nortel DMS100/200 switch this interface provides a second option making the CO-ACD host computer U S WEST's responsibility. The interface described is between the U S WEST host and the customer owned remote terminal. This interface allows customers the flexibility to access real time MIS information from their remote terminals and other Call Center activity such as, report management, load management and banner/reader board capabilities.

### Locations And Timing of Deployment:
